## SECTION 4 FIRST AID MEASURES

<b>Eye Contact:</b>	Immediately flush eyes with large amounts of water and continue flushing until irritation subsides. If irritation persists call a physician. If material is hot, treat for thermal burns and take victim to hospital immediately.
<b>Skin Contact:</b>	Remove contaminated clothing. Wash contaminated area thoroughly with soap and water. If redness or irritation occurs, seek medical attention. If material is hot, submerge injured area in cold water. If victim is severely burned, remove to a hospital immediately. Wash contaminated clothing before reuse.
<b>Inhalation:</b>	If inhaled remove to fresh air. If difficulty in breathing occurs, give oxygen, call a physician. Seek medical attention if irritation or discomfort persists.
<b>Ingestion:</b>	As little as 60 ml may cause blindness or fatality. Immediately give two glasses of water and induce vomiting. Call physician. Never give anything by mouth to an unconscious person.
<b>Note to physician:</b>	Provide standard methanol ingestion treatment. To prepare the antidote, make a solution using 100 ml of 100-proof ethyl alcohol (grain alcohol) in 2000 ml of water and give 1.5 ml per kg of body weight or 100 ml for an average adult. Following this, at 2 hour intervals for 4 days, give the antidote (0.5 - 1.0 ml/kg of body weight) orally or intravenously to reduce the metabolism of the methanol and to allow time for its excretion. Blood ethanol levels should be maintained at 1.0 - 1.5 mg/ml.

## SECTION 5 FIRE FIGHTING MEASURES

<b>Flash Point:</b>	Min. 12°C (54°F) by Tag Closed Cup, ASTM D 56
<b>Upper Flammable Limit:</b>	Not determined
<b>Lower Flammable Limit:</b>	Not determined
<b>Extinguishing Media:</b>	Use dry chemical, alcohol foam, water spray, water fog or carbon dioxide if appropriate for the surrounding fire.
<b>Special Fire Fighting Procedures:</b>	Exercise caution when fighting any chemical fire. Evacuate affected area, stay upwind and avoid smoke and fumes. Use water spray to cool containers. If smoke and fumes cannot be avoided, a self-contained breathing apparatus and protective clothing are essential.
<b>Unusual Fire and Explosion Hazards:</b>	Flammable Liquid. Flame is invisible in daylight. Methanol-water mixtures will burn unless very dilute. Mixtures with 25% or more methanol are OSHA Class I flammable liquids. Follow appropriate National Fire Protection Association (NFPA) codes.
<b>By-products of Combustion:</b>	Thermal decomposition or combustion will produce carbon dioxide and water. Incomplete combustion may produce carbon monoxide
<b>Auto-ignition Temperature:</b>	Not determined
<b>Explosion Data:</b>	Not determined

## SECTION 6 ACCIDENTAL RELEASE MEASURES

<b>Spill Procedures (Land):</b>	Wearing appropriate personal protective equipment, contain spill, collect onto inert absorbent and place into suitable containers.
